

Reach the right students, before they've made up their mind.

Vula is a free, WhatsApp-native career-guidance tool for South African Grade 10–12 learners. In under 5 minutes, a learner answers 30 tappable questions and gets a personalised career profile, a downloadable PDF report, and – where relevant – sees your courses surfaced as the match for their interests and province.

THE PROBLEM YOU ALREADY KNOW

Most SA schools have one career counsellor for hundreds of learners, if any at all. Learners lock in Grade 9/10 subject choices with almost no real information about what those choices open or close off.

By the time your recruitment team reaches them in Grade 12, many have already ruled themselves out of your programmes without realising it.

HOW IT WORKS FOR YOU

- A learner completes their profile on WhatsApp – no app, no login, works on any phone.
- If their RIASEC profile and province match your programme, your course is surfaced directly inside their results.
- You reach prospective students by genuine interest fit and geography – not by buying a generic list and hoping it lands.

WHAT YOU GET

Targeted placement

Shown only to learners whose profile and province actually match your programme.

Zero data risk

Vula never hands you a learner's personal information – no database to secure, no POPIA exposure on your side.

Brand presence

Your name and course details in front of learners at the decision point, not after.

Simple reporting

Impression counts per course, so you can see reach without ever touching learner-level data.

PRICING

Billed annually – **pay for ten months, get twelve.**

PACKAGE	REACH	SHARED SLOT	SOLO – YOU OWN IT
Provincial	Learners in one province	R65,000 PER YEAR · R6,500/MO	R180,000 PER YEAR · R18,000/MO
National	Learners in all nine provinces	R250,000 PER YEAR · R25,000/MO	R700,000 PER YEAR · R70,000/MO
Founding Sponsor FIRST 5-10 ONLY	Any package above, plus logo placement on the Vula marketing site and first right of refusal on a joint case study		50% off YEAR 1

Shared – matched by interest profile; where another sponsor also matches, the closer match is shown. Annual shared sponsors get an impression floor – fall short and your term extends free. **Solo** – no other sponsor is shown to any learner in your province (or nationwide) for the term.

Excl. VAT, payable annually in advance; monthly rates shown for comparison. Compare against your current cost-per-acquired-student via open days, print, or digital ads – sponsorship typically undercuts all three.

Why this is lower-risk than a data buy

Vula's model is sponsorship, not lead sales – deliberately. You get visibility with the right audience without becoming a second custodian of minors' personal information. That's a POPIA exposure most institutions would rather not take on, and Vula's structure means you never have to.

HOW TO GET STARTED

- 1 See it live**
15-minute call or live demo of the WhatsApp flow, end to end.
- 2 Pick your package**
Provincial or national, shared or solo.
- 3 Sign**
A short, standard sponsorship agreement, attorney-reviewed before use.
- 4 Go live**
Your courses start showing to matching learners within days of signing.

Vula Career Guide (Pty) Ltd · Reg. 2026/021440/07

The audience, by province

VULA – SPONSOR ONE-PAGER
MARKET DATA

2,902,751
learners in Grades 10-12 nationally – the window in which subject choices harden into career options

8,949
secondary and combined schools those learners sit across

38%
fewer learners in Grade 12 than Grade 10 – the audience is weighted to the earlier grades

PROVINCE	GR 10-12 LEARNERS		SHARE	SCHOOLS
KwaZulu-Natal	690,057		23.8%	2,108
Gauteng	538,883		18.6%	1,465
Limpopo	398,932		13.7%	1,406
Eastern Cape	383,404		13.2%	1,589
Mpumalanga	262,840		9.1%	713
Western Cape	240,134		8.3%	607
North West	176,927		6.1%	522
Free State	156,362		5.4%	382
Northern Cape	55,212		1.9%	157
South Africa	2,902,751		100%	8,949

These are enrolment figures, not Vula's audience.

They describe how large the addressable market is in each province. Vula is pre-launch and its own reach is currently the waitlist. Sponsor reporting shows impressions actually delivered to real learners – never market size.

Learner figures: Department of Basic Education, **School Realities 2023** (published December 2023), Table 4 – ordinary public and independent schools, Grades 10-12; the most recent national dataset. Provincial figures sum exactly to the published national total of 2,902,751. School counts: Vula schools database (EMIS-derived).

WHAT IT WOULD TAKE TO PAY FOR ITSELF

Sponsorship is a fixed annual cost, so break-even is simply your own cost per acquired student – a number you already know and we don't. Below is what each package would need to return over a year to cost you nothing. Find your column.

PACKAGE	IF A STUDENT COSTS YOU R3,000 TO ACQUIRE	R7,500	R15,000
Provincial – shared R65,000/yr	22	9	5
Provincial – solo R180,000/yr	60	24	12
National – shared R250,000/yr	84	34	17
National – solo R700,000/yr	234	94	47

Enrolments needed = annual fee ÷ your cost per acquired student, rounded up. Vula makes no forecast of how many enrolments a sponsorship will produce – this table sets the bar your own economics imply, nothing more.

WHAT THE LEARNERS ARE CHOOSING INTO

60.9%
of South Africans aged 15-24 are unemployed – Stats SA, Q1 2026

10.1%
absorption rate for that age group: the share actually in work

2.9m
learners picking subjects that open or close those doors years early

Vula is free to every learner, permanently – no app, no data cost, no fee. Sponsorship is what pays for that. A sponsor funds career guidance for learners whose schools cannot provide it, and reaches the ones whose interests genuinely fit their programmes. Those are the same act, which is the point of the model.
