

Reach the right students, before they've made up their mind.

Vula is a free, WhatsApp-native career-guidance tool for South African Grade 10–12 learners. In under 5 minutes, a learner answers 30 tappable questions and gets a personalised career profile, a downloadable PDF report, and — where relevant — sees your courses surfaced as the match for their interests and city.

The problem you already know: most SA schools have one career counsellor for hundreds of learners, if any at all. Learners lock in Grade 9/10 subject choices with almost no real information about what those choices open or close off. By the time your recruitment team reaches them in Grade 12, many have already ruled themselves out of your programmes without realising it.

How it works for you

- ✓ A learner completes their profile on WhatsApp — no app, no login, works on any phone.
- ✓ If their profile and city match your programme, your course is surfaced directly inside their results, at the exact moment they're exploring that career path.
- ✓ You reach prospective students by genuine interest fit and geography — not buying a generic list and hoping it lands.

What you get

- ✓ Targeted placement — shown only to learners whose profile and city actually match your programme.
- ✓ Zero data risk — Vula never hands you a learner's personal information; no database to secure, no POPIA exposure on your side.
- ✓ Brand presence — your name and course details in front of learners at the decision point, not after.
- ✓ Simple reporting — impression counts per course, so you can see reach without ever touching learner-level data.

Pricing

Tier	What's included	Price
City Sponsor	1 institution, up to 3 courses, shown to learners in one city	R5,000/mo
National Sponsor	Shown to learners nationwide	R20,000/mo
Founding Sponsor	Either tier above, at a discount, plus logo placement on the Vula marketing site and first right of refusal on a joint case study (first 5–10 sponsors only)	50% off Yr 1

Excl. VAT. Compare against your current cost-per-acquired-student via open days, print, or digital ads — sponsorship typically undercuts all three.

Why this is lower-risk than a data buy: Vula's model is sponsorship, not lead sales — deliberately. You get visibility with the right audience without becoming a second custodian of minors' personal information. That's a POPIA exposure most institutions would rather not take on, and Vula's structure means you never have to.

How to get started

- 1 15-minute call or live demo of the WhatsApp flow, end to end.
- 2 Pick a tier and city (or go national).
- 3 Sign the sponsorship agreement — a short, standard template, attorney-reviewed before use.
- 4 Go live — your courses start showing to matching learners within days of signing.
